Objective

Full-Stack Developer and Computer Science undergraduate specializing in Data Science, with hands-on experience building AI-powered Android apps, Web2 and Web3 platforms, and client-facing products. Experienced in integrating large language models, designing backend systems with Supabase and REST APIs, and leading community tech initiatives across blockchain and open-source ecosystems. Seeking opportunities to apply full-stack, AI/ML engineering and Data Science skills to build impactful, production-grade products.

Education

- 2023 – 2027 **B.Tech in Computer Science (Data Science)**, Marri Laxman Reddy Institution of Technology and Management, Hyderabad, India
- 2021 – 2023 **Intermediate MPC (Science)**, Sri Chaitanya Junior Kalasala, Telangana, India

Experience

- Dec 2024 – **Tech Contributor**, *Climate Action Front*, Delhi, India (Remote)
- Present
- Developed and deployed the CAF website to facilitate climate governance information and investor decision-making.
 - Organized and maintained the climate data repository; analyzed datasets to generate actionable insights for clients in climate policy and investment.
- Sep 2024 – **Head of Hyderabad Chapter**, *Big Blockers Community*, Hyderabad, India
- Aug 2025
- Led community outreach to promote blockchain technology across Hyderabad through events and bootcamps.
 - Conducted workshops on legal and real-world blockchain applications and smart contract development for students and professionals.
- Jun 2024 – **Blockchain Developer Intern**, *Timechain Labs*, Remote
- Oct 2024
- Built full-stack web applications using Next.js, Node.js, and Svelte; developed a RESTful To-Do app with Swagger API documentation.
 - Worked with Neon DB and Prisma ORM for database management; implemented Web3 smart contract functionality in the Cryptolite platform.
- May 2024 – **Scrum Master Intern & Volunteer**, *Swecha Telangana*, Hyderabad, India
- Aug 2024
- Led Agile ceremonies (sprint planning, standups, retrospectives) as a certified Scrum Master across internal projects.
 - Contributed to web development initiatives and applied Agile principles to improve delivery timelines and testing efficiency.
- Oct 2024 – **Open Source Contributor (WoB)**, *GirlScript Summer of Code 2024*, Remote
- Nov 2024
- Contributed to open-source web projects by fixing bugs and implementing features; earned the "Contributor (WoB)" badge.

Projects

- Mar 2025 **Volt — AI-Powered Nutrition & Hydration Tracker**, *Personal Project*, Android / Kotlin / Jetpack Compose
- Built a native Android app (Kotlin + Jetpack Compose) for AI-powered nutrition and hydration tracking, featuring food logging via camera vision, voice input, and barcode scanning using Google Gemini 2.5 Flash and ML Kit.
 - Developed deep analytics dashboards, a Glance-based home screen widget, and an AI Coach that generates personalized weekly debriefs from real user data.
 - Architected a full backend on Supabase (PostgreSQL + Edge Functions + Auth) with RevenueCat subscription scaffolding across ~5,500 lines of Kotlin.
- Aug 2025 **Aira — Emotional Support Companion**, *Personal Project*, React Native / FastAPI / Python
- Curated a custom emotional support dataset, trained a lightweight NLP model in Google Colab, and deployed it via FastAPI integrated with a React Native (Expo) frontend.
 - expo.dev/accounts/kazexyt/projects/aira-frontend
- Jul 2024 **Cryptolite — Web3 Wallet Platform**, *Internship Project*, Next.js / Web3 / Blockchain
- Built a Web3 full-stack platform with raw wallet, saved profiles, cloud wallet, and bounty features. cryptolite.vercel.app
- Jan 2025 **Climate Action Front Website**, *Client Project*, Next.js / Vercel
- Developed a full company website with team pages, blog section, and climate resources for a Delhi-based NGO. climate-action-front.vercel.app

Technical Skills

Languages	JavaScript, Python, Kotlin, R, HTML, CSS, SQL
Frameworks	Next.js, React, React Native, Node.js, Svelte, FastAPI, Jetpack Compose
Databases	PostgreSQL, Supabase, Neon DB, Prisma ORM
Tools	Git, GitHub, Vercel, Netlify, Postman, Swagger, Google Cloud, Power BI, Expo, Android Studio
Blockchain	Smart Contracts, Web3, BSV Blockchain, Wallet Integration
AI / ML	Gemini API, Vertex AI, ML Kit, Model Training, Dataset Curation, Google Colab, Generative AI
Methodologies	Agile, Scrum, REST API Design, Open Source Contribution

Certifications

NVIDIA	Generative AI Explained — Deep Learning Institute
Google	Google Cloud Computing Foundations Certificate; 16 Google Cloud Skill Badges including Kubernetes, Vertex AI Gemini API, Gemini Multimodal RAG, GenAI with Streamlit, Prompt Design, Build Real World AI Apps with Gemini & Imagen, Store/Process/Manage Data on Google Cloud (CLI & Console), Set Up App Dev Environment, ML APIs, Implement Load Balancing on Compute Engine (2023–2025)
Cisco	Data Analytics Essentials · Junior Cybersecurity Analyst Career Path · Network Technician Career Path · Network Addressing and Basics · Hardware & Upgrade Support · Operating Systems Support · Security & Connectivity Support · Introduction to Modern AI · Apply AI: Analyze Customer Reviews · Introduction to Data Science · Python Essentials 1 & 2 · CCNA: Introduction to Networks · CCNA 200-301 (In Progress)
Unity	Unity Essentials Pathway
EF SET	English Certificate 67/100 — C1 Advanced
Microsoft	Copilot for Security Ninja Training
BSV Academy	Bitcoin Script · Bitcoin Enterprise
FreeCodeCamp	JavaScript Algorithms & Data Structures · Responsive Web Design · Front End Development Libraries
Postman	API Fundamentals Student Expert
Timechain Labs	Skilled Developer
